LEGALTECHTALK

# Best of Breed

# Process

A female conductor with long brown hair, wearing a black sleeveless top and blue earrings, is captured in a dynamic pose, gesturing with her right hand raised and holding a baton in her left. She is leading an orchestra, with several violinists visible in the foreground. The background is a blurred audience in a concert hall.

# Orchestration

# The way we deliver legal work is broken.

## Process inefficiency

54% of law firm respondents are focused on process efficiency in 2025

## Focus on profitability

Reduce waste, minimise risk and maximise productivity and profitability

## AI Chaos

AI landscape is evolving at lightning speed - offering flexibility is paramount

## Regulation & compliance

Regulation & compliance with client requirements will impact broad adoption

It's time to redesign legal for speed, scale and better client outcomes

Generative AI is a  
powerful enabler.

Not a silver bullet!

# The hard yards.

Shiny AI tool

Process Mapping

Complexity of work

Risk

Change management

Regulatory change

The importance

of being model

agnostic.

Generative AI is no  
longer  
“just content”  
it is now a process  
actor.

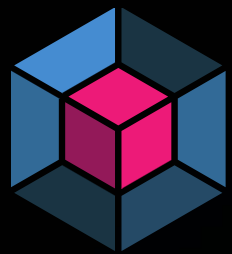

All of the agents

True transformation  
comes from combining  
process orchestration, AI  
and human expertise.
